Larry:

The link you sent is only the text of the human health risk assessment. You will find the tables, figures and other information at <http://www.epa.gov/region5/cleanup/pines/> under the heading Technical Documents.

Thank you.

But, Matt, Shouldn't the HHRA web page have all the pieces of the HHRA? Why would you post a deficient document as if it were whole?

Larry

Hi Larry:
The complete HHRA is also at the repository (Michigan City Public Library) on disk.
Thank you.

Matt, I appreciate you sending these references. However, I have, so far, not been able to locate the tables and the figure on EPA's HHRA Yard 520 web reference. Specifically, I googled "HHRA Yard 520" and got a listing for your Human Health Risk Assessment at the site

www.epa.gov/Region5/cleanup/pines/pdfs/pines-hhra-201207.pdf

which gave me the text of the HHRA and, in the Table of Contents, a List of Tables which cited the 4 tables you listed, and a List of Figures which cited the Figure you listed. However, this HHRA does not contain any tables, nor any figures.

How might I find these tables and the figure? Do you have another web reference? Your further assistance would be appreciated.

Thanks

Larry Jensen

Dear Larry:

I understand from our conversation at the last town council meeting that you are unable to find locations in the human health risk assessment and feasibility study where the Municipal Water Service Extension ("MWSE") sample data and interpretations are presented. Samples of CCBs were in fact collected from the MWSE trenches and used as surrogates for residential surface soil in the Human Health Risk Assessment. Please see the following references for your convenience.

HHRA

Table 2-2 – Data on Inorganic composition of Suspected CCBs, Samples Collected During the Municipal Water Service Extension

-

(MWSE)

- Table 3-1 – MWSE and Yard 520 Samples Used in Human Health Risk Assessment
- Table 3-19 – Selection of Radionuclide Constituents of Potential Concern – Suspected CCBs (MWSE)
- Table 5-29 – Selection of Exposure Point Concentrations for Suspected CCBs (MWSE) - Radionuclides
- Figure 6 – MWSE and Yard 520 Sample Locations
- Sections 3.1 (Data Evaluation), 3.1.1 (Chemical Data Evaluation), and 3.1.2 (Radionuclide Data Evaluation)

FS

- Sections 2.2.1 (CCB Visual Inspections), 2.2.3 (Chemistry of Suspected CCBs), 2.3.3, and 2.3.4.1 (Results of Chemical and Radiological Risk Assessment – Non-Drinking Water Pathways)

Please don't hesitate to contact me with any questions or concerns you may have in this matter
Thank you.
